

Name : _____

GCF - Fractions

MS5

Reduce each fraction to its lowest term.

1) $\frac{28}{92}$
GCF of 28 and 92 = _____

$$\frac{28}{92} \div \frac{\square}{\square}$$

$$\frac{28}{92} = \underline{\hspace{2cm}}$$

2) $\frac{30}{66}$
GCF of 30 and 66 = _____

$$\frac{30}{66} \div \frac{\square}{\square}$$

$$\frac{30}{66} = \underline{\hspace{2cm}}$$

3) $\frac{19}{48}$
GCF of 19 and 48 = _____

$$\frac{19}{48} \div \frac{\square}{\square}$$

$$\frac{19}{48} = \underline{\hspace{2cm}}$$

5) $\frac{16}{72}$
GCF of 16 and 72 = _____

$$\frac{16}{72} \div \frac{\square}{\square}$$

$$\frac{16}{72} = \underline{\hspace{2cm}}$$

7) $\frac{12}{24}$
GCF of 12 and 24 = _____

$$\frac{12}{24} \div \frac{\square}{\square}$$

$$\frac{12}{24} = \underline{\hspace{2cm}}$$

8) $\frac{36}{54}$
GCF of 36 and 54 = _____

$$\frac{36}{54} \div \frac{\square}{\square}$$

$$\frac{36}{54} = \underline{\hspace{2cm}}$$
