

## Perimeter of a Parallelogram

Find the indicated side lengths of each parallelogram from the given perimeter.

1)

Perimeter = 66 in

$x =$  \_\_\_\_\_

DA = \_\_\_\_\_

AB = \_\_\_\_\_

2)

3)

Perimeter = 30 yd

$x =$  \_\_\_\_\_

UV = \_\_\_\_\_

VW = \_\_\_\_\_

4)

Perimeter = 118 ft

$x =$  \_\_\_\_\_

EF = \_\_\_\_\_

HE = \_\_\_\_\_

Perimeter = 152 in

$x =$  \_\_\_\_\_

DE = \_\_\_\_\_

GD = \_\_\_\_\_

7) The adjacent side lengths of a parallelogram are  $(x + 5)$  yards and  $(-2 + 3x)$  yards. Determine the value of  $x$  and the lengths of the adjacent sides, if its perimeter is 70 yards.
