Name : _____

Surface Area of Square Pyramids

Example:

Surface area = base area + $\frac{1}{2}$ × perimeter × slant height

Base area = side × side = 8 × 8 = 64 ft²

Perimeter = 4 × side = 4 × 8 = 32 ft

Surface area = 64 + $\frac{1}{2}$ × 32 × 12

= **256 ft²**
Find the surface area

1)

Surface Area = _____
