

Name : _____

Score : _____

Solving Compound Inequalities

Multi-step: S2

Solve each inequality.

1) $-52 \geq 13(4x + 36)$ or $-6 \geq \frac{x}{2} + x$

2) $3 \geq \frac{x+19}{8}$ and $\frac{x-15}{10} < -4$

3) $-9 \leq \frac{8x+5}{3} < 15$

or $\frac{7x-2}{5} \geq 8$

5) $\frac{-x+35}{4} > 11$ or $\frac{-x-}{7}$

d $-27 > 3(2x - 5)$

7) $x + \frac{6x}{5} \leq -22$ and $13(7 + 5x) < 26$

8) $6 > \frac{3x-9}{2} > -12$
