

## Perimeter of a Parallelogram

Find the indicated side lengths of each parallelogram from the given perimeter.

1)

Perimeter = 110 mm

$x =$  \_\_\_\_\_

$YZ =$  \_\_\_\_\_

$XY =$  \_\_\_\_\_

2)

Perimeter = 58 cm

$x =$  \_\_\_\_\_

$PQ =$  \_\_\_\_\_

$SP =$  \_\_\_\_\_

3)

4)

Perimeter = 26 m

$x =$  \_\_\_\_\_

$CD =$  \_\_\_\_\_

$DA =$  \_\_\_\_\_

Perimeter = 90 mm

$x =$  \_\_\_\_\_

$LM =$  \_\_\_\_\_

$MJ =$  \_\_\_\_\_

7) The adjacent side lengths of a parallelogram are  $(x - 9)$  cm and  $(x + 3)$  cm. Determine the value of  $x$  and the lengths of the adjacent sides, if its perimeter is 64 cm.
