

Name : _____

Scale Factors

L2S1

- 1) Henry painted a picture of his house on canvas. The actual width of the driveway is 20 feet. If it is represented with a width of 4 inches on the canvas, what was the scale factor used?

- 2) The distance between Janet's home and her office is represented on the map with a scale factor of 1 inch = 5.6 miles. If the distance between the two locations on the map is 3 inches, calculate the actual distance between the two locations.

- 3) At the museum, Melanie sketched a drawing of a dinosaur. The height of the dinosaur in the drawing is 3.7 inches. The actual height of the dinosaur is 11.1 feet. What scale factor did Melanie use to sketch the drawing?
