

Name : _____

Score : _____

Lattice Multiplication

2-digit : S4

Use lattice multiplication method to find the product in each problem.

1) 62×54

A 2x2 lattice grid for multiplying 62 by 54. It consists of four squares arranged in a 2x2 pattern, separated by dashed lines.

$62 \times 54 =$ _____

2) 87×10

A 2x2 lattice grid for multiplying 87 by 10. It consists of four squares arranged in a 2x2 pattern, separated by dashed lines.

3) 33×78

A 2x2 lattice grid for multiplying 33 by 78. It consists of four squares arranged in a 2x2 pattern, separated by dashed lines.

$33 \times 78 =$ _____

4) 94×36

A 2x2 lattice grid for multiplying 94 by 36. It consists of four squares arranged in a 2x2 pattern, separated by dashed lines.

$94 \times 36 =$ _____

7) 50×81

A 2x2 lattice grid for multiplying 50 by 81. It consists of four squares arranged in a 2x2 pattern, separated by dashed lines.

$50 \times 81 =$ _____

A 2x2 lattice grid for multiplying 27 by 69. It consists of four squares arranged in a 2x2 pattern, separated by dashed lines.

$27 \times 69 =$ _____

15) 15×23

A 2x2 lattice grid for multiplying 15 by 23. It consists of four squares arranged in a 2x2 pattern, separated by dashed lines.

$15 \times 23 =$ _____

16) 76×45

A 2x2 lattice grid for multiplying 76 by 45. It consists of four squares arranged in a 2x2 pattern, separated by dashed lines.

$76 \times 45 =$ _____
