

Name : _____

Solve the Equations

L2S2

Solve.

$$1) \quad -\frac{P(11, 2r + 1)}{P(11, 2r)} - 13 = -16$$

$$2) \quad \frac{P(3, 3) + C(50, 49)}{C(8, r) \times r!} = \frac{7}{P(7, r)}$$

$$3) \quad \frac{80C(2n - 1, 2)}{P(6, 2) - 4C(5, 2)} = \frac{P(8n, 8n - 6)}{C(8n, 8n - 5)}$$
